

Abstract

Title: Description of Fire Brigade of Prague Airport and analysis of its firefighting intervention in the period of 2015-2019.

Objectives: The aim of the thesis is to give a description of Fire Brigade of Prague Airport. An analysis and evaluation of firefighting interventions at the airport is also provided by means of graphs and tables from 1.1.2015 to 31.1.2019 period.

Methods: The data were obtained from an employee of Fire Brigade of Prague Airport. Available literature was studied and a research was carried out. The data were analyzed using descriptive statistics and statistical data comparison between each year. The data analysis was split according to type and number of interventions for individual years in the period of 2015-2019. Finally, the analysis was evaluated and the data were compared by means of graphs and tables.

Results: The output of the diploma thesis is a description and intervention analysis of Fire Brigade of Prague Airport in the years 2015, 2016, 2017, 2018 and 2019.

Keywords: analysis, intervention, firefighters, fire brigade
